 - d) Badminton would be the right game for you, if you _____ (a fit person).

PART – B

(5×16=80 Marks)

11. Read the following passage and answer the questions given below : (16 Marks)

Have you ever had the desire to wander the world and see what was out there ? While some people prefer to stay in the comfort of their own homes, others have been bitten by the travel bug and can't wait to explore the world. Every year millions of people pack their suitcases or put on backpacks and flock to visit the seven continents of the world. They wander through the castles and museums of Europe, and the cities and natural wonders of North and South America. Some visit the vast exotic cultures of Asia, Africa and the Middle East. And a few lucky people even make to the most mysterious continent on the earth – Antarctica. Why do people want to explore the world ? It gives them a better perspective about the earth and the people living on it. It opens their minds, it gives them a feeling of accomplishment, and it makes them feel alive. Every year, thousands of people try to climb the world's highest mountains or walk across continents. In the past, explorers had compasses and maps, but today's adventurers have satellite phones and GPS. They also use their travels to let the world know about climate change and help people in the countries they visit.

Jake from Austria fell in love with climbing as a teenager. When he left school, he worked as a teacher and climbed in his free time. Starting with Everest, he has been climbing all the world's fourteen peaks over 8,000 metres. To increase the challenge, Jake climbs without using oxygen tanks. Low oxygen levels can make climbers ill, so Jake has to climb slowly. Jake is passionate about Nepal and raises money for a charity for poor children and orphans there.

Ed Stafford from the UK is the first person to walk the length of the Amazon River. He started by a small stream in the Andes Mountains of Peru and arrived at the river's mouth in Brazil, two years and four months later. Snakes, crocodiles and jaguars live in the Amazon rainforest, so it's a dangerous place. Luckily, Ed avoided the big animals, but he was bitten by ants and mosquitoes every day. Ed used his walk to let the world know about climate change and raise money for environmental charities in Brazil and Peru.

Despite new technologies, adventurers still have to live with terrible weather, lack of food and wild animals. Preparation and training are essential, but if you have a sense of adventure, there are continents to cross and hundreds of mountains to climb.

- i) To be bitten by the travel bug actually refers to
 - a) the travel bug which is a dangerous insect
 - b) having the urge to travel
 - c) the bag that travelers usually carry
 - d) a bug that corrupts satellite phones
