TRAINING FEEDBACK FROM STUDENTS

(2021-2022)

Name of the Student : A. Baskiya Priya

Department : CSE

Year/Semester : IV / 08

Date : 30/4/2022

Name of the training : Basic of web technologies.

Name of the trainer : J. Monisha

SL. NO.	PARAMETERS	AVERAGE RATING
1.	Usefulness of the program	5
2.	Content of the training	5
3.	Has this training increased your confidence level	5
4.	Was the trainer knowledgeable	5
5.	Training methodology	4
6.	Any additional training required in the related area (YES/NO)	Yes

(Guideline for rating: 5- Excellent, 4-Good, 3- Satisfactory, 2-Average, 1-Poor)

Comments (if any):

This workshop was useful in my studies. But the training timing is minimum. Next time please two (or) three days workshop in based on web development.

Report

The Department of Computer Science and Engineering has arranged a Workshop on “Basics of Web Technology” for 3rd and 4th year CSE students to be held on 30.04.2022. The workshop aimed at introducing the basics of HTML, so as to cultivate among the students an interest in the area of Web Development and also help them to take steps in their journey as a web developer. The workshop was handled by Ms.J.Monisha, Programmer (Full Stack Developer), Integra Software Services, Pondicherry. The resource person focused more on understanding the logic behind the various lines of code and HTML tags. She gave helpful tips and hacks to the students to make their code stand - Out. Students were actively participated in the workshop. Students get motivated through this workshop.

REPORT

The Department of Computer Science and Engineering has arranged a seminar on "Roadway to Become an Entrepreneur" for all the CSE students to be held on 07.05.2022 in Conference Hall in between 10.30 AM to 12.30 PM. The aim of this seminar is to inculcate the fundamentals, key concepts and various facts of entrepreneurship as an alternative career option. The seminar was handled by Mrs. Devi Priya, Founder - Cinderella closet, Arts and Craft store. The resource person talked about how design thinking process can help entrepreneur to get clear picture of the problem and how to convert that into viable business idea. She shared her entrepreneurship journey and explained how entrepreneurs see a problem as an opportunity for business. She conducted few activities on to open up their own ideas about entrepreneurship. Students were actively participated and they found very much helpful.

Subject: JUKE (October 2021) is Live now! (Electric 2 Wheeler Design Challenge)

To:

Dear Mentors,

Warm greetings from Graspear Solutions Private Limited.

Are you a beginner, intermediate or expert in Product Design or Automation?

- a) Product design using CAD/CAM softwares [Mechanical/Automobile]
- b) Automation using Arduino, Raspberry Pi or any Embedded Programming [Electrical/Electronics/Mechatronics]

It doesn't matter at what stage you are now...
this is the time to up-skill and celebrate...

Visit <https://graspear.com/design> to know more about JUKE - a National Level product designing festival organized by Graspear Solutions in collaboration with Ajlon Technologies.

Participants will be eligible to receive...

- **Job Opportunity**
- **One Year Internship**
- **Work with Licensed Softwares**
- **Up to \$5,000 Cloud Credit**

Just Keep Designing...

Registration closes on **1st October 2021 (Friday)**

Please pass this grand event information to your students to make use of this opportunity and avail the benefits.

Colleges with more participation will also be recognized.

**JUKE
OCTOBER 2021**

We are happy to certify that

K SRILEKHA < 422118105021 >

Topic of the Seminar : **“ INTER-INTEGRATED CIRCUITS”**

HOD

Power Point Slides

Inter-Integrated Circuit (I2C)

Inter-Integrated Circuit (I2C)

- ***An inter-integrated circuit (InterIC or I2C) is a multi-master serial bus that connects lowspeed peripherals to a motherboard, mobile phone, embedded system or other electronic devices.***
- ☒ Philips Semiconductor created I2C with an intention of communication between chips reside on the same Printed Circuit Board (PCB).
- ☒ It is a multi-master, multislave protocol.
- It is built on two lines
- ☒ SDA (Serial Data)– The line for the master and slave to send and receive data
- ☒ SCL (Serial Clock)– The line that carries the clock signal.

Working of I2C

- The I2C, data is transferred in messages, which are broken up into frames of data.
- Each message has an address frame that contains the binary address of the slave, and one or more data frames that contain the data being transmitted.
- The message also includes start and stop conditions, read/write bits, and ACK/NACK bits between each data frame.

- The following are the bits in data frames:
- **1. Start Condition:** The SDA line switches from a high voltage level to a low voltage level before the SCL line switches from high to low.
- **2. Stop Condition:** The SDA line switches from a low voltage level to a high voltage level after the SCL line switches from low to high.
- **3. Address Frame:** A 7 or 10 bit sequence unique to each slave that identifies the slave when the master wants to talk to it.
- **4. Read/Write Bit:** A single bit specifying whether the master is sending data to the slave (low voltage level) or requesting data from it (high voltage level).
- **5. ACK/NACK Bit:** Each frame in a message is followed by an acknowledge/noacknowledge bit. If an address frame or data frame was successfully received, an ACK bit is returned to the sender from the receiving device.

I2C Message Format

Topic of the Seminar : **“ INTERNAL COMMUNICATION METHODOLOGIES IN
COMPUTER SYSTEM”**

HOD

Power Point Slides

INTERNAL COMMUNICATION METHODOLOGIES

INTERNAL COMMUNICATION METHODOLOGIES

- CPU of the computer system communicates with the memory and the I/O devices in order to transfer data between them.
- The method of communication of the CPU with memory and I/O devices is different. The CPU may communicate with the memory either directly or through the Cache memory.
- However, the communication between the CPU and I/O devices is usually implemented with the help of interface.
- There are three types of internal communications:
 - Programmed I/O
 - Interrupt driven I/O
 - Direct Memory Access (DMA)

Workflow in programmed I/O

Programmed I/O

- Programmed I/O is implicated to data transfers that are initiated by a CPU, under driver software control to access registers or memory on a device.
- With programmed I/O, data are exchanged between the processor and the I/O module.
- The processor executes a program that gives it direct control of the I/O operation, including sensing device status, sending a read or write command, and transferring the data.
- When the processor issues a command to the I/O module, it must wait until the I/O operation is complete.
- If the processor is faster than the I/O module, this is wasteful of processor time.
- With programmed I/O, the I/O module will perform the requested action and then set the appropriate bits in the I/O status register.
- The I/O module takes no further action to alert the processor.
- When the processor is executing a program and encounters an instruction relating to I/O, it executes that instruction by issuing a command to the appropriate I/O module.

Interrupt Driven I/O

- The CPU issues commands to the I/O module then proceeds with its normal work until interrupted by I/O device on completion of its work.
- For input, the device interrupts the CPU when new data has arrived and is ready to be retrieved by the system processor. The actual actions to perform depend on whether the device uses I/O ports, memory mapping.
- For output, the device delivers an interrupt either when it is ready to accept new data or to acknowledge a successful data transfer.
- Memory-mapped and DMA capable devices usually generate interrupts to tell the system they are done with the buffer.
- Although Interrupt relieves the CPU of having to wait for the devices, but it is still inefficient in data transfer of large amount because the CPU has to transfer the data word by word between I/O module and memory.

Below are the basic operations of Interrupt:

1. CPU issues read command
2. I/O module gets data from peripheral whilst CPU does other work
3. I/O module interrupts CPU
4. CPU requests data
5. I/O module transfers data

Direct Memory Access (DMA)

- Direct Memory Access (DMA) means CPU grants I/O module authority to read from or write to memory without involvement.
- DMA module controls exchange of data between main memory and the I/O device.
- Because of DMA device can transfer data directly to and from memory, rather than using the CPU as an intermediary, and can thus relieve congestion on the bus.
- CPU is only involved at the beginning and end of the transfer and interrupted only after entire block has been transferred.

CPU bus signals for DMA transfer

Operations in DMA

- When valid data are in the disk controller's buffer, DMA can begin. The DMA controller initiates the transfer by issuing a read request over the bus to the disk controller.
- This read request looks like any other read request, and the disk controller does not know whether it came from the CPU or from a DMA controller.
- The memory address to write to is on the bus address lines, so when the disk controller fetches the next word from its internal buffer, it knows where to write it.
- The write to memory is another standard bus cycle.
- When the write is complete, the disk controller sends an acknowledgement signal to the DMA controller, also over the bus.
- The DMA controller then increments the memory address to use and decrements the byte count. If the byte count is still greater than 0, steps 2 through 4 are repeated until the count reaches 0.
- At that time, the DMA controller interrupts the CPU to let it know that the transfer is now complete.
- When the operating system starts up, it does not have to copy the disk block to memory; it is already there.
- The DMA controller requests the disk controller to transfer data from the disk controller's buffer to the main memory, in the first step, the CPU issues a command to the disk controller telling it to read data from the disk into its internal buffer.

COLLEGE OF ENGINEERING AND TECHNOLOGY
(Approved by AICTE New Delhi, Affiliated to Anna University, Chennai)
(An ISO 9001:2015 Certified Institution)
ANGUCHETTYPLAYAM, PANRUTI – 607 106.

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

STUDENT SEMINAR

EVALUATION SHEET

Name of the Student : **VIVETHITHA P , VIJAY V&RASU R**

Register Number : **422118105023, 422118106301&422118105018**

Year/Semester : **IV/VII**

Date and Time : **06.03.2022 @ 3:30 pm**

Topic of the Seminar : **“ INTERNAL COMMUNICATION METHODOLOGIES IN
COMPUTER SYSTEM”**

	PRESENTATION CONTENT (10)	PRESENTATION STYLE (10)	ANSWERING QUESTIONS (10)	REMARKS
Class Incharge	9	7	8	Good Dr
HOD	9	6	7	Better one

DEPARTMENT OF MECHANICAL ENGINEERING

CIRCULAR (2021-2022)

CIR. No.: SACET/MECH/CIR/28

Date: 04.02.2022

It is to be informed that the **Student Seminar** will be held for IV/VIII year/sem students at Mechatronics Lab. All interested staff and students are invited for the seminar.

Name of the Student : **JEGAN S**

Register Number: **422117114501**

Year/Semester : **IV/VIII**

Date and Time : **06.02.2022 @ 3:30 pm**

Topic of the Seminar : **“CRYPTOGRAPHY ”**

HOD

Power Point Slides

CRYPTOGRAPHY

- Cryptography is a method of protecting information and communications through the use of codes, so that only those for whom the information is intended can read and process it.
- Crypt means "hidden"
- Graphy stands for "writing"

Cryptography refers to secure information and communication techniques derived from mathematical concepts and a set of rule-based calculations called algorithms, to transform messages in ways that are hard to decipher.

- These deterministic algorithms are used for
 - cryptographic key generation
 - digital signing
 - verification to protect data privacy
 - web browsing on the internet
 - confidential communications such as credit card transactions and email.

NETWORK SECURITY

Network security is any activity designed to protect the usability and integrity of your network and data.

- It includes both hardware and software technologies
- It targets a variety of threats
- It stops them from entering or spreading on your network
- Effective network security manages access to the network

INTRODUCTION

- Computer data often travels from one computer to another, leaving the safety of its protected physical surroundings. Once the data is out of hand, people with bad intention could modify or forge your data, either for amusement or for their own benefit.
- Cryptography can reformat and transform our data, making it safer on its trip between computers. The technology is based on the essentials of secret codes, augmented by modern mathematics that protects our data in powerful ways.

INTRODUCTION Contd.

- **Computer Security** - generic name for the collection of tools designed to protect data and to thwart(prevent) hackers(theif)
- **Network Security** - measures to protect data during their transmission
- **Internet Security** - measures to protect data during their transmission over a collection of interconnected networks

Aspects of Network Security:

- ITU-T Recommendation X.800 "Security Architecture for OSI" describes network security in three aspects:
 - security attack
 - security service
 - security mechanism

Key Security Concepts

Aspects of Network Security:

- ITU-T Recommendation X.800 "Security Architecture for OSI" describes network security in three aspects:
 - security attack
 - security service
 - security mechanism

Key Security Concepts

International Telecommunication Union - ITU

➤ Examples of Security Requirements

- Confidentiality – student grades
- Integrity – patient information
- Availability – authentication service

➤ Levels of Impact

- Can define 3 levels of impact from a security breach
- Low
 - Moderate
 - High

International Telecommunication Union - ITU

OSI Security Architecture

- ITU-T X.800 "Security Architecture for OSI"
- defines a systematic way of defining and providing security requirements
- for us it provides a useful, if abstract, overview of concepts we will study

Aspects of Security

- Consider 3 aspects of information security:
 - A. security attack
 - B. security mechanism
 - C. security services
- **Important Terms:**
 - Threat* – a potential for violation of security
 - Attack* – an assault on system security, a deliberate attempt to evade security services
