**Appointment Letter for The Role of Electrical Engineer**

Dear Prithvi Rajan.P

In regards to all our last discussions, with pleasure, we are offering you an appointment for the role of an Electrical Engineer. On 4<sup>th</sup> May, 2018 you are to report to our organization's Electrical Engineer. You will have to work for a minimum duration of eight hours a day. You will be on probation for a period of one year from the date of joining.

Your remuneration as Electrical Engineer will be

Basic Salary : Rs. 8000.00  
Dearness Allowance : Rs. 3500.00  
H.R.A : Rs. 2500.00  
C.A : Rs. 1000.00  
-----  
**Total : Rs.15000.00**

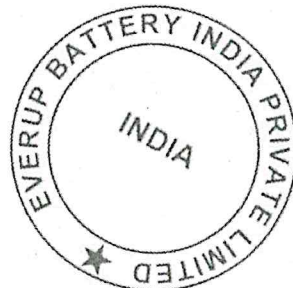

An Electrical Engineer's job primarily is to Implement, design, and control electrical products and systems. Develop the manufacturing processes according to the global engineering standard and codes. Manage the engineering projects and deliver them on stipulated time; Ensure that applications and installations are all in line with the customer needs and safety standards; Collaborate with the engineers and the technicians for designing and applying new system processes; Perform performance and quality analysis on new IT systems.

Summarizing data and reports on the test results; Examining needs on the new equipment, calculating costs, and helping to prepare budgets; Monitoring inspection and maintenance plans. With great pleasure and expectation we welcome you to the organization and hope to have a very successful relationship.

**Appointment letter for the position of a CNC operator**

Dear Manoj Kumar.A

We would like to congratulate you on your selection for the position of CNC operator in our company New Tech Auto Components Pvt. Ltd. We will be glad to have you with us. Your total remuneration package (on a Cost to Company basis) would be Rs.2,10,000/- per annum. This remuneration consists of a fixed component and a performance bonus of up to Rs.30,000/- per annum..

On behalf of our company New Tech Auto Components Pvt. Ltd, you will have to take some responsibilities as a CNC operator. You will be solely responsible for managing computer numeric controlled (CNC) equipment in the entire procedure from set up to the operation. You will have to monitor machines, oversee the finished product. You will have to make sure that our company yields quality parts and tools specific to engineering drawings and which will maintain a proper client standard.

Your job descriptions also include setting up and managing CNC machines to represent different jobs incorporating drilling, grinding, milling. You will also have to check and schedule all the machinery actions by accomplishing production and quality logs. Moreover, you will have to give timelines to the clients. You will have to address any logistics issues that emerge in the process of creating parts. Most importantly, you should always keep conducting a regular CNC machine assessment.

We hope your job description is informed here properly. If you want to show interest in this proposal, our company always welcomes you.

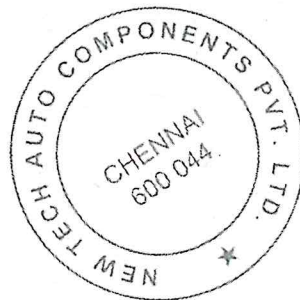

You just have to make a confirmation by providing your signature in the copy of this appointment letter as the job acceptance. Don't forget to attach the required formal documents.

If you have any questions regarding this offer would make contact our board.

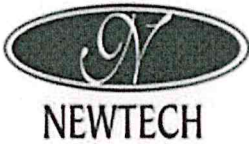

**Thanks & Regards**

**Appointment letter for the position of a CNC operator**

Dear Athidhan.A

We would like to congratulate you on your selection for the position of CNC operator in our company New Tech Auto Components Pvt. Ltd. We will be glad to have you with us. Your total remuneration package (on a Cost to Company basis) would be Rs.2,10,000/- per annum. This remuneration consists of a fixed component and a performance bonus of up to Rs.30,000/- per annum..

On behalf of our company New Tech Auto Components Pvt. Ltd, you will have to take some responsibilities as a CNC operator. You will be solely responsible for managing computer numeric controlled (CNC) equipment in the entire procedure from set up to the operation. You will have to monitor machines, oversee the finished product. You will have to make sure that our company yields quality parts and tools specific to engineering drawings and which will maintain a proper client standard.

Your job descriptions also include setting up and managing CNC machines to represent different jobs incorporating drilling, grinding, milling. You will also have to check and schedule all the machinery actions by accomplishing production and quality logs. Moreover, you will have to give timelines to the clients. You will have to address any logistics issues that emerge in the process of creating parts. Most importantly, you should always keep conducting a regular CNC machine assessment.

**Appointment letter for the position of a Mechanical Engineer**

Dear Rajalinga Prabu.R

We would like to congratulate you for appointing you for the position of Mechanical Engineer in our company Prasanna Precision Tools.

You will receive a certain amount of fixed salary of Rs. 15000 monthly on behalf of the company. In this role, you will have to perform necessary tasks in the processing of any products such as fabrication, maintenance, repair of parts of products. You will also have to nurture cleanliness in the work areas for safety and quality requirements.

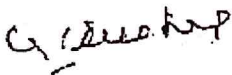

Moreover, as an assembler, you should have an aptitude for mechanics in detail. You will have to use tools to repair parts of the products. Elucidating the technical documents like diagrams, schematics, blueprints will also be added to your job description. You will have to team up with other members to assemble products.

Most importantly, it is expected that you are well skilled in teamwork and identifying any defective items to handle it.

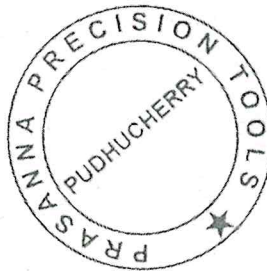

With great pleasure and expectation we welcome you to the organization Prasanna Precision Tools Private Limited and hope to have a very successful relationship.

If you still have any queries, then you can contact our HR team.

You will also have to nurture cleanliness in the work areas for safety and quality requirements.

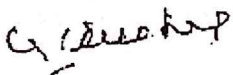

Moreover, as an assembler, you should have an aptitude for mechanics in detail. You will have to use tools to repair parts of the products. Elucidating the technical documents like diagrams, schematics, blueprints will also be added to your job description. You will have to team up with other members to assemble products.

Most importantly, it is expected that you are well skilled in teamwork and identifying any defective items to handle it.

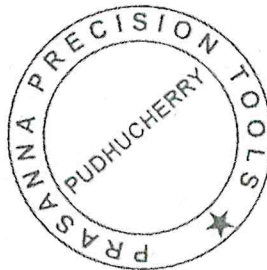

With great pleasure and expectation we welcome you to the organization Prasanna Precision Tools Private Limited and hope to have a very successful relationship.

If you still have any queries, then you can contact our HR team.
