

ST. ANNE'S COLLEGE OF ENGINEERING AND TECHNOLOGY

Approved by AICTE, New Delhi. Affiliated to Anna University, Chennai,

Accredited by NAAC

ANGUCHETTYPALAYAM, PANRUTI – 607 106.

DSPACE

DSpace is an open source repository software package typically used for creating open access repositories for scholarly and/or published digital content. While DSpace shares some feature overlap with content management systems and document management systems, the DSpace repository software serves a specific need as a digital archives system, focused on the long-term storage, access and preservation of digital content. Digital Library hosts Open Access digital repositories using D Space, allowing member institutions to provide reliable online access to their scholarly and instructional output. With a digital repository hosted by the TDL, institutions can collect, store, preserve, and disseminate digital content – including documents, audio files, images, and datasets – all within a secure, professionally managed environment. D Space is a widely-used open-source repository software that can manage and preserve all types of digital content and facilitates indexing of that content by commercial search engines, such as Google.
