### ABOUT WHOLE PERSON EDUCATION

Whole person education in higher education emphasizes the holistic development of students, acknowledging that intellectual growth is interconnected with emotional, social, spiritual and ethical dimensions. The primary objective of whole person education includes cultivating critical thinking skills, fostering emotional intelligence, promoting ethical decision-making, and nurturing a sense of social responsibility. The approach also endorses diverse range of pedagogic and evaluation practices towards growth and development of students for success in a rapidly changing world. The whole person education approach can be adopted as part of the ethos of colleges or Universities. It can also be practiced by educators in their classrooms. The approach has implications for every stakeholder in education and opens avenues to foster all round development.
