Subject: Invitation as Resource Person for Workshop on "IoT Basics and Its Applications"

Respected Sir,

Warm greetings from St. Anne's College of Engineering and Technology

I hope this message finds you well. I am writing on behalf of the Department of Electrical and Electronics Engineering, St. Anne's College of Engineering and Technology, to invite you to serve as a Resource Person for a Workshop on "IoT Basics and Its Applications."

The objective of this workshop is to provide participants with a fundamental understanding of the Internet of Things (IoT), including its architecture, communication protocols, sensor integration, and real-world applications. We believe your expertise and experience in this field will greatly benefit our students.

We would be honoured if you could accept our invitation and share your knowledge with our participants. The institution will be pleased to provide an honorarium and make necessary arrangements as per norms.

Kindly confirm your availability at your earliest convenience so that we can proceed with the formal arrangements.

Thank you very much for considering our request. We look forward to your positive response and to hosting you for this workshop.

Warm regards,

A.Sundarapandiyan

Respected Sir/Madam,

I am pleased to acknowledge receipt of your invitation to serve as the Resource Person for the Workshop on "IoT Basics and Its Applications" organized by the Department of Electrical and Electronics Engineering, St. Anne's College of Engineering and Technology on 28.08.2024

I am delighted to accept your invitation and look forward to conducting the session on IoT fundamentals, system components, and real-world applications. It will be a pleasure to share my knowledge and experiences with your students and faculty members.

Kindly share any specific guidelines regarding the session duration, participant profile, and technical arrangements so that I can prepare accordingly.

Thank you once again for the opportunity. I look forward to contributing to the success of the workshop.

IoT AND ITS APPLICATIONS

COURSE OBJECTIVES:

1. Students will be explored to the interconnection and integration of the physical world and the cyber space. They are also able to design & develop IOT Devices.
2. cover the basics, including the various sensors, connectivity options, and data processing methods used in IoT systems.
3. to connect devices and systems to collect, exchange, and analyze data, enhancing efficiency, productivity, and decision-making.

COURSE SYLLABUS:

Introduction & Concepts: Introduction to Internet of Things• Physical Design of IOT• Logical Design of IOT• IOT Enabling Technologies• IOT Levels• Home Automation,

Arduino Programming and Library Installation • Sensor Integration with Arduino • Use case Development using Arduino • Hardware Selection for Long range communication

COURSE OUTCOMES:

Students can able to

1. Identify the Components that forms part of IoT Architecture.
2. determine the most appropriate IoT Devices and Sensors based on Case Studies.
3. setup the connections between the Devices and Sensors.
4. Collect and analyze telemetry from connected sensors, devices, and equipment for real-time tracking, monitoring, management, and remote control.

Report on “IoT Basics and Its Applications”

Department of Electrical and Electronics Engineering in association with Eddy Labs, Cuddalore had organized a workshop on “IoT basics and its applications” at Power System Simulation Laboratory on 28.08.2024 Mr. S. Balabakar AP/ECE was the Resource Person and the event started with Prayer Song in the presence of Faculties and students of the department. Third year student Ms. Abinaya gave the welcome address to the Resource Person. Mr.K.Sriram Head of the Department introduced the chief guest and insisted the students to attend the Workshop with great interest throughout the session. The objective of the workshop was to acquaint participants with the concept of Internet of Things (IoT) and provide hands-on experience in integrating hardware components, specifically to create a practical IoT-oriented project. The students provided an overview of IoT, explaining how they work by emitting ultrasonic waves and measuring the time taken for the waves to bounce back after hitting an object.

Participants were given Arduino Uno boards and LEDs to practice the concepts they had learned. They were guided step-by-step through the process of setting up the circuit, connecting the components, and writing the necessary code to make the LED blink. This hands-on experience allowed them to grasp the connection between software and hardware. Attendees were taught how to upload the code onto the Arduino board using the Arduino IDE. They learned about the compilation and uploading process, and how to troubleshoot any errors that might occur. After uploading, participants tested the LED blinking program to observe the results. They followed step-by-step instructions to assemble the circuit, connect the wires, and upload the provided code to the Arduino. The students discussed real-world IoT applications that involve LED-like components. Examples included smart lighting systems, environmental monitoring, and home automation, illustrating how basic concepts could be expanded into complex projects. Ideas such as smart traffic management, industrial automation, and healthcare applications were explored

The workshop concluded with a Vote of Thanks by Mr.V.Balaji AP/EEE followed with a feedback session Overall, the workshop was so enlightened and it must make a spark within students to get innovated ideas and involved in real time projects.

the various aspects of personality development incorporated into the induction program and its impact on students.

Creative Arts:

The inclusion of creative arts in the first-year induction program is aimed at providing a balanced and holistic introduction to the academic environment. This component serves as an outlet for self-expression, encourages creativity, and fosters cultural appreciation among students. Creative arts activities, ranging from visual arts to performing arts, play a pivotal role in enhancing the overall development of students. This report delves into the structure, significance, and outcomes of the creative arts segment of the induction program.

Sports & Fun Games:

As part of the induction program for first-year students, sports activities were organized to promote physical fitness, teamwork, and camaraderie among the new students. The sports session was designed to introduce students to the importance of maintaining a healthy lifestyle while balancing academic responsibilities. It also provided a platform for students to showcase their athletic abilities, bond with peers, and foster a sense of community.

Cultural Program:

As part of the induction program for first-year students, a cultural program was organized to welcome and introduce new students to the diverse and vibrant campus culture. The program aimed to foster interaction, showcase talents, and create a sense of belonging among students from various backgrounds.

YOGA:

The purpose of the yoga class was to introduce first-year students to the practice of yoga as a part of their induction program. The goal was to help them relax, improve focus, and promote mental and physical well-being during the transition into college life.

The session started with a brief introduction to yoga, highlighting its benefits in maintaining balance between the body and mind. The instructor emphasized how regular practice of yoga can aid in stress management, improve concentration, and enhance overall health.

STUDENTS PARTICIPATED IN YOGA

OUTCOMES:

- The induction program successfully eases students into their new academic setting by familiarizing them with campus resources, faculty, administrative processes, and peer networks.
- Activities like public speaking, group discussions, and presentations significantly boost students' verbal and written communication skills.

DEPARTMENT OF SCIENCE & HUMANITIES

- Through the Universal Human Values (UHV) component, students develop a strong ethical foundation, which encourages responsible decision-making and behaviour.
- Engaging in creative arts and mindfulness activities helps students manage stress, maintain emotional balance, and promote relaxation, leading to better mental health.
- Hands-on experiments, field trips, and interdisciplinary projects help students apply the principles of physics and chemistry in real-world scenarios. This enhances their understanding of the subjects and builds problem-solving skills.
- The program equips students with foundational knowledge and skills that prepare them for more advanced coursework in their chosen disciplines, helping them excel in their studies.

REPORT ON FIRST YEAR INDUCTION PROGRAM

The First Year Induction Program at St. Anne's College of Engineering and Technology aims to welcome new engineering students, familiarize them with the university's culture, and provide essential information regarding their academic journey. Totally, 142 students were participated.

Objectives of the Program:

- To orient students to university life and academic expectations.
- To introduce faculty members and support staff.
- To provide information on academic resources, extracurricular activities, and career opportunities.
- To encourage interaction among peers and faculty.

Program Details:

The program was conducted for two weeks with the following topics:

Proficiency Modules in English:

As part of the induction program for first-year students, an English Proficiency Class was conducted to enhance the language skills of students, many of whom come from diverse linguistic backgrounds. The objective of the session was to improve students' communication skills, particularly in English, which is critical for academic success and career development.

Department Familiarisation & Department Activity:

The induction program for first-year engineering students serves as a crucial foundation for introducing students to the engineering department and familiarizing them with its activities, resources, and academic environment. The aim is to ensure a smooth transition from school to college life, promote student engagement, and instil a sense of belonging to the department.

Application of Maths:

As part of the induction program for first-year students, a Mathematics Proficiency Class was conducted to assess and strengthen the foundational mathematical skills required for

academic success in higher education. The session aimed to bridge gaps in students' understanding and ensure that all students, regardless of their prior educational background, are adequately prepared for the rigorous mathematical concepts they will encounter in their respective courses.

Proficiency Modules in Computer Science:

As part of the induction program for first-year students, a Computer Proficiency Class was organized to equip students with essential computing skills that are crucial for both academic and professional success. The session aimed to familiarize students with fundamental computer operations, software applications, and internet usage, which are integral to their academic activities and daily tasks in a digital learning environment.

Application of Physics & Chemistry:

The inclusion of fundamental sciences such as physics and chemistry in the first-year induction program provides students with an understanding of how these subjects are applied in real-world scenarios. By emphasizing the practical applications of these sciences, the program helps students appreciate their relevance beyond the classroom. This component of the induction program encourages critical thinking, problem-solving, and innovation, which are vital for future academic and professional success.

Universal Human Values:

The integration of Universal Human Values (UHV) into the first-year induction program aims to instil ethical principles, foster self-awareness, and nurture a sense of responsibility among students. This component is crucial for developing well-rounded individuals who are not only academically competent but also sensitive to societal and environmental concerns. The UHV module helps students reflect on their personal values, behaviour, and the impact of their actions on society and the world.

Personality Development:

The induction program for first-year student's plays a crucial role in helping them transition smoothly into the academic and social environment of the institution. One of the core elements of this program is personality development, which aims to build students' self-

REPORT ON WORKSHOP

Title of the workshop : MONGODB

Organized by : CoSTA

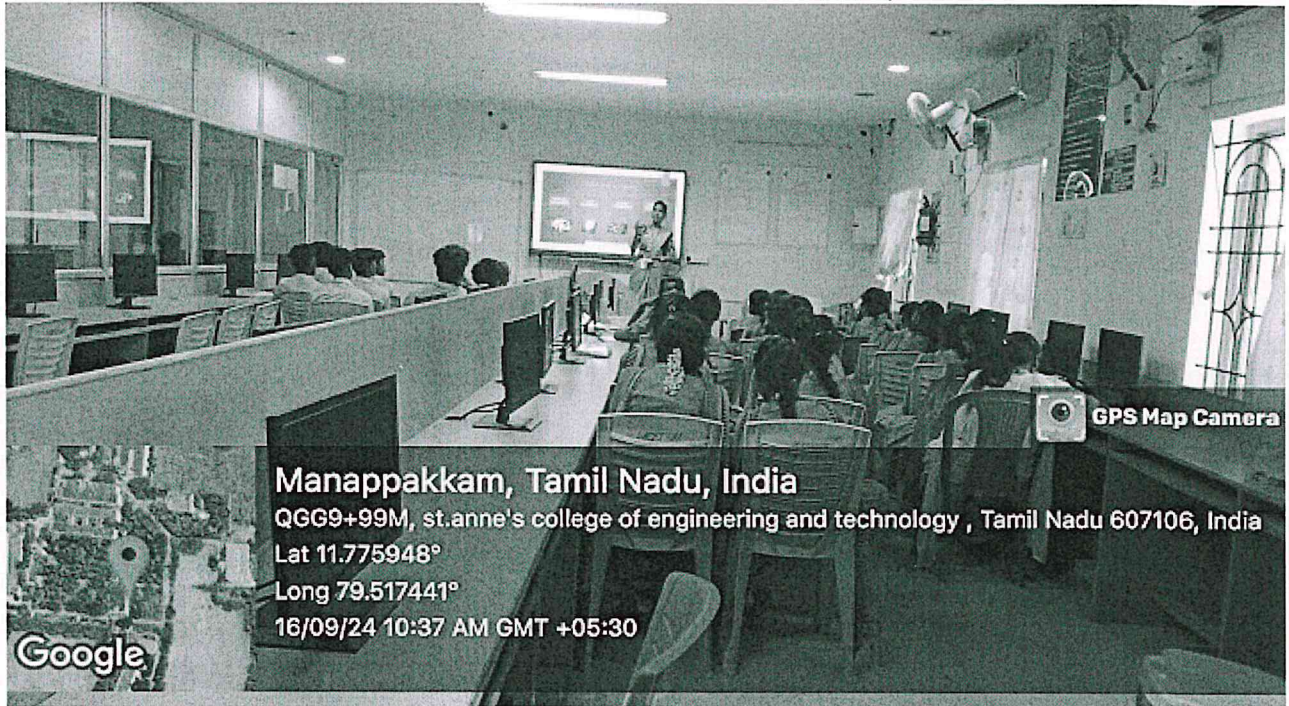

Date : 16.09.2024

Time : 10:15 AM.

Venue : LAB 4

Total Participants: 57 students

Resource Person: Ms. T.GAYATHRI, AP/CSE & Ms.S.ABINAYA, AP/CSE

Students listening to the workshop on 16.09.2024

The Department of Computer Science and Engineering and CoSTA in association with organized a workshop on the topic “**MONGODB**” on 16.09.2024 at 10:15AM. Ms. T.GAYATHRI, AP/CSE & Ms .S. ABINAYA, AP/CSE was the resource person. The programme started with prayer song.

Resource person, during this workshop covered the topics like Introduction to MONGODB, to query deep into documents, and even perform complex analytics pipelines with just a few lines of declarative code. The session was very interactive and dynamic. Resource person explained about MONGODB and JSON. At the end of workshop, feedbacks were collected from students. Students gained knowledge on MONGODB and its applications. The workshop was very useful to students.

WORKSHOP ON PYTORCH

OBJECTIVES:

- To learn to make it easy to build deep learning models.
- To gain the knowledge on deep neural networks.
- To make the students understand the importance of pytouch and pytorch using python library function.

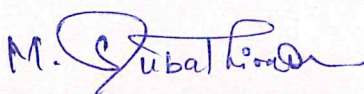

ABOUT THE PROGRAMME:

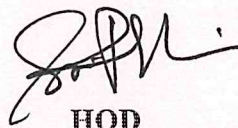

Department of Computer Science and Engineering organized a workshop on the topic "PYTORCH" on 18.09.2024 at 10:15 AM.

PYTORCH is the most trending technology in deep learning neural networks. This programme is intended to introduce the concept of neural networks in deep learning, supervised and unsupervised learning models and pytouch is the one of the library in python. This workshop helps the students to gain the knowledge on neural networks and its career opportunities.

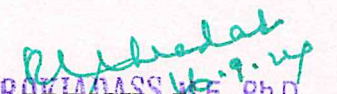

OUTCOMES:

- Students will be able to Learn how to implement neural networks in PyTorch, including training and testing
- Will be able to understand how to train and evaluate deep learning models for a range of applications
- Will understand the debugging, simple APIs, and compatibility with a wide range of extensions built-in Python
- Studets will be able to how to build an image recognition model using a neural network

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING WORKSHOP ON IMAGE PROCESSING TECHNIQUES USING MATLAB REPORT

OBJECTIVES:

- To enhance the quality of images, extract meaningful information from images, and automate image-based tasks.
- The objective of the workshop is to give exposure to the digital image processing algorithms that are found in the applications such as biometrics, agriculture, communication, and remote sensing.

REPORT:

The Department of Electronics and Communication Engineering (ECE), in association with the Electronics and Communication Science Association (ECSA) and the Institute Innovation Council (IIC), had arranged a two-day' workshop on digital image processing using MATLAB for third-year students on 27.09.2024 and 28.09.2024 at the VLSI lab. The program commenced with the inaugural event in the presence of our principal, Dr. R. Arokiadass, and Dr. Sr. S. Anita, the head of the department of electronics and communication. Around 50 students had participated and benefitted from this workshop. The workshop was designed to stimulate students' interest in the image processing domain for studying theory subjects as well as for doing a final year project.

On the first day of the workshop, students were taught about the introduction of image processing and the basic programs of image processing in MATLAB. The second day of the workshop, they were taught about the segmentation, edge deduction, and filtering of images, and practical sessions were conducted. This workshop will help the engineering students and enthusiasts/scholars get trained in the MATLAB package in the aspect of image processing. The workshop is designed to stimulate students' interest in the image processing domain by engaging them in a completely purpose-driven study environment with hands-on activities while fostering a sense of curiosity and accomplishment. This will open up a door for programming in image processing. The students' feedback is also good.

OUTCOMES:

Upon the completion of the course, students will be able

- To know about the basic programs of image processing in MATLAB.
- To know about the image enhancement, acquisition, and segmentation.
- To know about the filtering of images in image processing.

PROGRAM SCHEDULE

WORKSHOP ON ANTENNA DESIGN CHALLENGES USING ANSYS HFSS

COURSE CONTENT

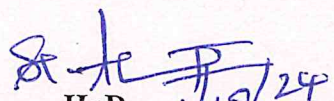

- Guided Media & Unguided Media
- Modes of Propagation in wireless communication
- Microwave Frequency Bands
- What is Electromagnetic Spectrum
- Training of research tool: HFSS
- Design of Microstrip patch antenna using Contact feed techniques
- Current Trends in 5G/6G

PROGRAM SCHEDULE

DATE	SESSION	TIME	TOPIC
DAY 1			
03/10/2024	I	9.30AM - 11.00Am	Introduction to wireless Communication Systems and various types of antenna
BREAK (11AM to 11.15AM)			
03/10/2024	II	11.15AM - 12.35PM	Explanation about HFSS Tool Bar and Calculation for Rectangular Microstrip patch antenna

ANTENNA DESIGN CHALLENGES USING ANSYS HFSS REPORT

Resource Person: Mr. S. Durairaj, AP/ECE,
Mrs. B. Mary Amala Jenni, AP/ECE

Date: 03.10.2024 & 05.10.2024

The Department of Electronics and Communication Engineering in association with Electronic and Communication Scientia Association (ECSA) and Institute Innovation Council (IIC) has arranged a two days workshop on “ANTENNA DESIGN CHALLENGES USING ANSYS HFSS” for final year (VII-Semester) ECE students.

Objective:

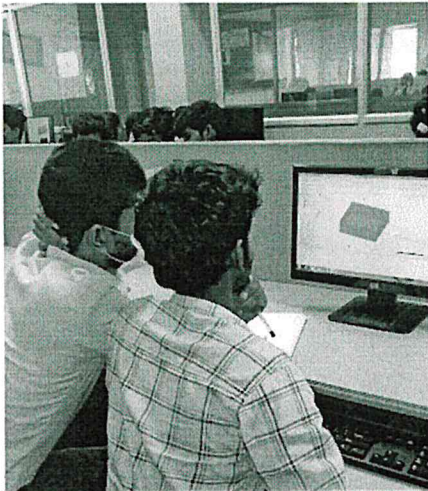

To demonstrate the Introduction to Communication Systems and various types of antenna, which is a powerful and a great platform for building low-cost, but highly capable in antenna design.

Outcomes:

- Students learnt to create interesting applications with basic Antenna Design.
- Students got hands on exposure on working on HFSS to design an microstrip patch antenna using offset feed techniques and inset feed techniques.

Report:

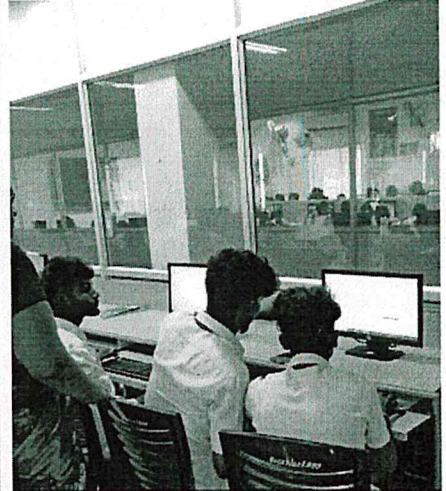

All the final year students of the Department of Electronics and Communication Engineering participated in this workshop. The program commenced with the inaugural event in the presence of our principal, Dr. R. Arokiadass, and Dr. Sr. S. Anita, the head of the department of electronics and communication. Around 25 students participated and benefitted from this workshop. The first day of the workshop, the students were taught about the basics of communication systems with research tools HFSS and designed the Microstrip patch antenna using offset feed techniques which include the calculation part also. The second day, students were taught about Design of Microstrip patch antenna using Inset feed techniques and Assign Excitation and boundary conditions for inset feed techniques. Hands-on training was given. Students were learned to work under the Design of Circular patch antenna using offset feed techniques with different types of meta-materials and smart antennas.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

WORKSHOP ON ROBOTICS

REPORT

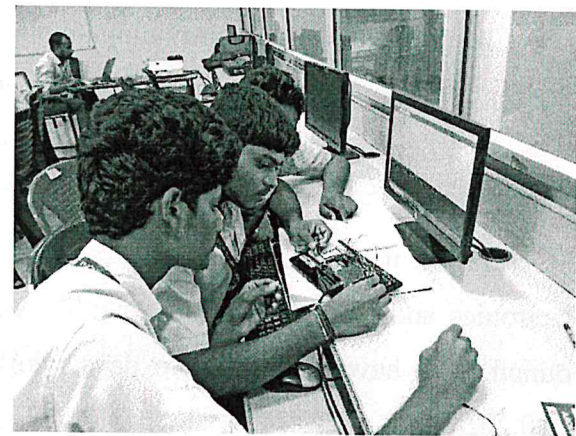

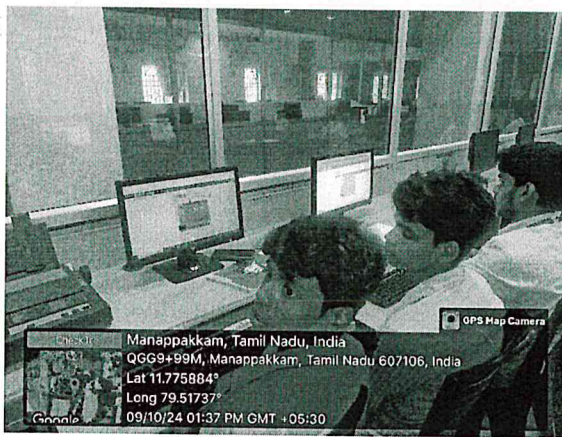

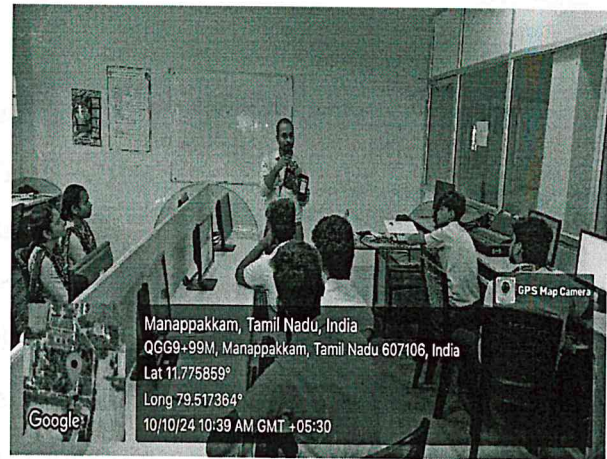

OBJECTIVES:

- To provide deep insight into Robotics building blocks.
- To develop Robot assembly & testing skills
- To explore the available sensors for Robotics
- To bridge the gap by providing an opportunity to the participants, so that they can write robotics programs to interface different types of input/output devices with the Microcontroller to do different projects.

REPORT:

The Department of Electronics and Communication Engineering (ECE), in association with the Electronics and Communication Scientia Association (ECSA) and the Institute of Innovation Council (IIC) have arranged two days' workshop on "Robotics" for second year students on 09.10.2024 and 10.10.2024 at VLSI lab/Embedded lab. The program commenced with the inaugural event in the presence of event coordinator Mr. R. Radhakrishnan, Assistant Professor/ECE & Mr. S. Durairaj, Assistant Professor/ECE. Mr.S. Balabasker, Assistant Professor/ECE, Mrs. B. Samadhana Priya, Assistant Professor/ECE, acted as resource person for this workshop. Around 35 students participated and benefited from this workshop. The aim of the workshop is to make the students learn the basics of robotics and to drive a two-wheeled robot. On the first day of workshop students were taught about the introduction of robotics and how we design online platforms like TinkerCAD and wokwi. Students were also taught Introduction about Arduino UNO, explained about robotics and its application in our day-to-day life, explained basic programs which are done to dump in Arduino for the movement of robots. On the second day of the workshop, they were taught to develop the programs i.e., Software part, of the process of designing robots. Dumping a code to the motor through Arduino IDE software which helps them to move in a particular direction. This workshop will help our students to get trained in Arduino IDE Software. Students were separated into 8 batches and to each batch component to build a two-wheeled robot was given. A competition was also conducted for the students, in which the students had to drive the robot in a particular direction. The resource persons verified all the mini-projects

done by the students and gave their suggestions and comments. All the students were appreciated for their effort in driving the robot. The session ended with students' feedback.

OUTCOMES:

Upon the completion of the course, students will be able

- Introduction to Robotics & Robotics Systems.
- Understand about various types of sensory devices their working and applications
- Understanding more about microcontrollers.
- Understanding how Arduino, Raspberry Pi and microcontroller are involved in Robotics.
- Understanding Programming in Arduino

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING REPORT

The Department of Electronics and Communication Engineering (ECE) in association with Electro Spark (ECE Incubation Centre) has arranged two days' workshop on “**Electronic Circuit Designing using Proteus Software**” for Second Year ECE students from 12.09.2024 to 13.09.2024.

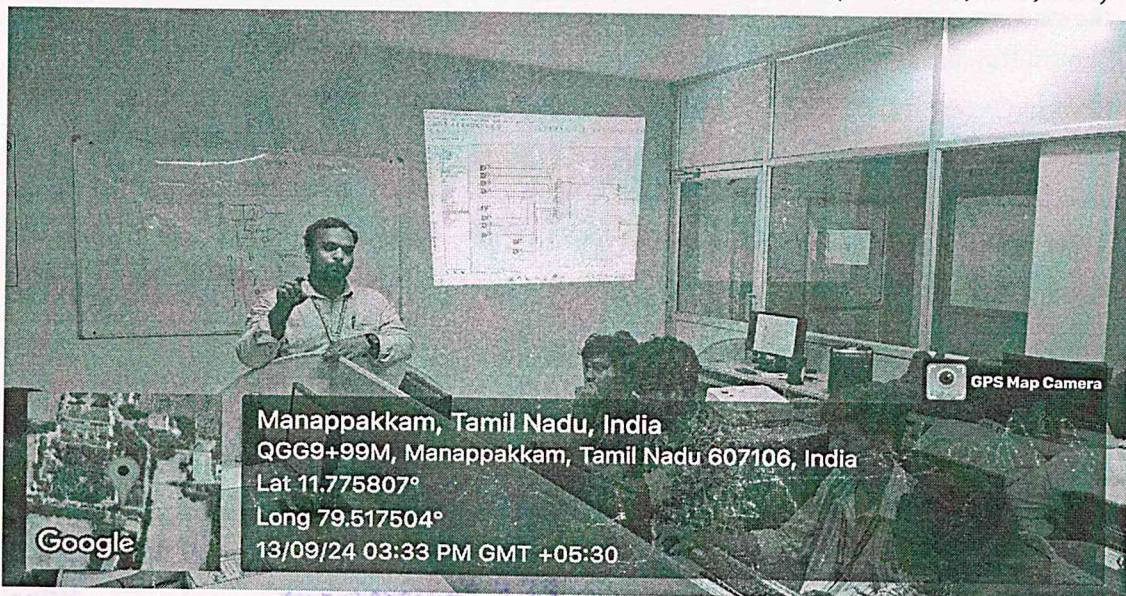

Objective:

- This workshop gives students deep knowledge in Core Electronic components and their specifications and creates interest in design of Electronic circuits using these components.
- Participants can learn how to build circuits, work with printed circuit boards (PCBs), and use design tools.
- Participants can learn how to design and analyze electronic circuits, and gain a practical understanding of basic electronics theory.

Report:

The workshop started with inaugural function in the presence of our respected principal Dr.R. Arokiadass and Our Head of the Department Dr. Sr. S Anita. The student of second year Ms. S. Varthika welcomed our dignitaries and resource persons Mr.V. Venkatesan and Mrs.B. Mary Amala Jenni, Assistant professors of ECE department. On the first day of the Workshop, the students were taught about Introduction to Proteus software Tool, and Hands-on-Training were given in design of basic circuits, voltage divider circuits, LED Blinking, RL, RC, RLC circuits, amplifier circuits using Proteus Software.

On the second day, Hands-on-Training were given in design of digital circuits, Half adder and full adder circuits, clippers, clampers circuit, design of filter circuits (LPF, HPF, BPF, BSF).

Around 33 students of Second year ECE Department had participated in this course. Finally, the students gave their valuable feedback about their experience in course. The session ended in a fruitful manner with a vote of thanks delivered by Ms.S.M. Kamalinisha, II-year ECE.

Course Outcomes:

After the completion of the course the student will be able to

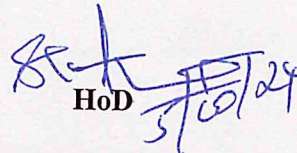

CO1: Identify and test various electronic components.

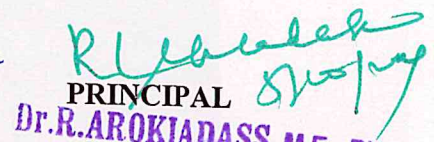

CO2: Draw circuit schematics with EDA tools.

CO3: Assemble and test electronic circuits on boards.

CO4: Work in a team with good interpersonal skills

Workshop on Non Destructive Testing Techniques

Objective:

- To learn the various NDT techniques are capable of locating defects and determining the features of the defects such as size, shape, and orientation.
- To know that inspect a component in a safe, reliable, and cost effective manner without causing damage.

Outcomes:

- We learned to understand and employing NDT is critical for ensuring the quality, safety of materials and components used in various industries.
- NDT can identify defects and abnormalities in materials and components.

REPORT OF THE PROGRAMME

Workshop On "Non Destructive Testing Techniques" on 08th November, 2024

The Mechanical Engineering Department organized a work shop on 8/11/2024 the topic "NDTT (Non Destructive Testing Techniques) with the support from Shri Sai NDT Centre Puducherry. Fifty-four (54) students participated in the workshop. The primary aim of the workshop was to introduce participants to the various techniques used in non-destructive testing and their applications in ensuring the structural integrity and safety of materials, equipment, and components. NDT methods play a critical role in industries such as aerospace, manufacturing, civil engineering, and power generation, offering the ability to detect flaws without compromising the object being tested.

□

The Non-Destructive Testing workshop provided valuable insights into the various techniques used for material inspection. Participants were able to experience firsthand the methods used to detect defects and ensure the structural integrity of critical components in various industries. The hands-on approach and expert guidance enhanced the participants' technical proficiency and deepened their understanding of NDT's role in ensuring safety and quality in engineering and manufacturing processes.

WORKSHOP ON HTML & CSS

OBJECTIVES:

- To understand the basics of HTML and CSS.
- To create a simple website using HTML and CSS.
- To apply styling and layout techniques using CSS.
- To understand the importance of semantic HTML and accessibility.

ABOUT THE PROGRAM:

Department of Computer Science and Engineering organized a workshop on the topic "HTML & CSS" on 21-02-2025 at 10.00AM.

HTML & CSS is the most trending technology in web application. This workshop is designed for students who want to learn the basics of web development and create their own websites. By attending this workshop, students will gain practical skills and knowledge that can be applied in various areas, such as:

- Building personal websites or blogs
- Creating websites for projects or assignments
- Enhancing career prospects in web development and related fields
- Improving digital literacy and online presence.

This workshop helps the students to gain the knowledge on web application and its career opportunities.

OUTCOMES:

- Students demonstrated a clear understanding of HTML and CSS fundamentals.
- Students were able to create a simple web page using HTML and CSS.
- Students applied styling and layout techniques using CSS.
- Students recognized the importance of semantic HTML and accessibility.

DEPARTMENT OF MECHANICAL ENGINEERING WORKSHOP ON DIGITAL FABRICATION

A one-day hands-on workshop on digital fabrication (3D Printing, CNC Woodcarving, and Laser Cutting) was conducted on 23rd April 2025 from 10:00 AM to 3:30 PM. The workshop aimed to introduce participants to digital manufacturing technologies that are transforming product design, prototyping, and fabrication. The resource person for the session was Mr.J.Jagan, Chairman – Vector Solutions, Pondicherry, who shared his expertise in rapid prototyping and digital fabrication. He brought along working models of the machines and provided live demonstrations using industry-relevant tools.

CNC-Woodcarving involves subtractive manufacturing using a rotating cutting tool controlled by computer code (G-code) to carve designs into wooden surfaces. It is used in furniture design, custom signage, and prototyping. A desktop CNC woodcarving machine was demonstrated. A 2D design was converted into a toolpath using CAM software. The carving process on a wooden block was shown live.

Laser-Cutting uses a high-powered laser beam to cut or engrave materials like acrylic, wood, leather, and plastic. It is widely used for precision cutting, signboards, artistic design, and prototyping. A mini laser cutter was used to cut and engrave on acrylic and MDF sheets. Participants saw how different materials require different power and speed settings.

3D Printing is an additive manufacturing process where material is deposited layer by layer to form a 3D object from a digital model. It is widely used for prototyping, modelling, and even final product fabrication. FDM (Fused Deposition Modelling) 3D printer was set up. A basic 3D model was loaded, sliced, and printed during the session. Participants observed the complete printing cycle: model import → slicing → machine operation. CAD Design softwares (TinkerCAD, SolidWorks) and Slicing Software (Ultimate Cura) were used. Students understood STL file format, importance of slicing parameters (layer height, infill, and support) and print bed levelling.
